

ABRASION/MECHANICAL

ROUNDIT® 2000 ST

Product Highlights

- Operating temperature from -70°C to +150°C (-94°F to +302°F)
- Excellent abrasion resistance
- Self-closing tubular design
- Integrated closure and locating system
- Eliminates the need of additional taping
- Easy to apply

ROUNDIT® 2000 ST is a self-closing oversleeve designed to provide mechanical protection. ROUNDIT 2000 ST is made out of a woven substrate of monofilament and multifilament polyester yarns equipped with an adhesive tape. This unique design gives the adhesive tape the double advantage of holding the sleeve in place on the application and being a secure closing system.

ROUNDIT 2000 ST is a system which offers a high level of component protection and eliminates the need of additional taping. It is both flexible and lightweight.

ROUNDIT 2000 ST fits tightly on wire harnesses, saving space, without reducing the flexibility of the wire bundles it protects. It also maintains a circular profile when flexed. Its self-wrapping design allows for quick and easy bundling of wire and cable assemblies. It easily allows for breakouts and can be installed over completed assemblies.

Our manufacturing sites are certified ISO 9001, ISO/TS 16949, or AS/EN 9100, and ISO 14001
